

Job Opportunity – Mechanical Engineer

Be part of a team that is tackling one of the largest challenges of our generation. As an Inventys employee, you will apply your talents in ways that make a difference in our world by directly contributing toward technologies to reduce greenhouse gas emissions.

Inventys is a clean energy technology company with a credible solution for capturing point-source CO₂ emissions and accelerating the global transition to a lower-carbon economy.

We are looking for a Mechanical Engineer to provide machine design, analysis, and validation alongside other team members to advance mechanical aspects of Inventys CO₂ capture technology.

Key Responsibilities:

- Generates mechanical solutions, concepts, and designs with good judgement according to sound design practices.
- Solves complex problems where analysis of a situation and data evaluation are required in order to meet specifications.
- Prepares and presents technical status reviews to show overall progress of a task or project.
- Independently carries out studies, tests and analysis interpretations and conclusions.
- Manages product and production documentation.
- Prepares requirements documentation, design documentation, drawings, and manufacturing documentation to control vendor made parts.
- Prepares manufacturing documentation, work instructions, assembly details, and control plans.
- Develops and performs design validation plans.
- Develops and performs equipment acceptance testing.

Qualifications:

- Education: Degree in Mechanical Engineering
- Experience: At least 5 years mechanical engineering in design, manufacturing, procurement and assembly of machine equipment
- Preferred Experience: Medium to Heavy Duty rotary equipment, composites and related manufacturing processes, face seals and sealing materials
- Fluent with SolidWorks for parts, large assemblies and product data management software
- Good understanding of manufacturing cost analysis for different manufacturing processes
- Working knowledge of SolidWorks FEA analysis for structural design
- Ability to work in a changing environment and evaluate/incorporate new processes and new technologies

- Critical thinking skills and good judgment
- Ability to work well with cross-functional teams and diverse groups of stakeholders
- Thrives in a changing, growing environment
- Demonstrates interpersonal skills required for cooperative working relationships both internally and externally
- Demonstrates written and oral communication skills
- Ability to work independently and as part of a team
- Can safely work in a shop with standard shop tools and equipment
- High level of initiative
- Good time management, with ability to organize, prioritize and meet deadlines
- Strong attention to detail
- Excellent listening skills
- Excellent analytical skills with ability to make sound recommendations
- Proficient with MS Office (Excel, PowerPoint, Word, Project)

As a team member you will work in a safety-first environment while enjoying competitive benefits, supportive co-workers, and interesting challenges to solve. You will grow through challenging work with diverse, talented people and by finding endless opportunities to learn and engage.
